## Early Learning Matters

### A *New Curriculum* for the DoD Child Development Program

#### Comprehensive & Research-Informed

- 50 weeks of developmentally appropriate activity plans for children organized by age ranges: Birth–12 months, 12–24 months, 24–36 months, 3–5 years
- A sequential and integrated approach to guided learning in all foundations of school readiness and life success
- Research-informed learning goals and practices that build on children’s developmental pathways
- Coordinated balance of intentional teaching and child-initiated exploration
- Fully aligned with NAEYC guidelines, including accreditation criteria, and early learning standards
- Expert input from DoD Child Development Program stakeholders, early childhood professionals, and Cooperative Extension Specialists
- Pilot testing in DoD child development centers

#### Ready-to-go Resources

- Concrete examples of high-quality implementation of activity plans, including scaffolding tips
- Efficient child observation and assessment procedures for individualizing children’s learning and sharing progress information with families
- Easy-to-use guides and training resources, including classroom observation checklists
- Engaging pictures, posters, cards, and other reproducible child-friendly materials
- Weekly parenting tips for supporting and extending children’s learning in families
- Adaptations for family child care homes

#### Supporting the whole child

#### Birth–36 Months

- Cognitive
- Communication/Language
- Physical/Health
- Self-Regulation
- Social-Emotional

#### 3–5 Years

- Creative Expression
- Language/Literacy
- Mathematics
- Physical/Health
- Science
- Self-Regulation
- Social-Emotional
- Social Studies
